Radio Zeeland DMP

Radio Zeeland was founded in 1952 and started as a small shop in Hulst and through the years it changed to a repair center for navigation and communication products in Terneuzen. Over time, the need for reliable and high-quality products for inland shipping became apparent. This triggered focus on development and production of navigation equipment. The core of our portfolio is our own rate of turn gyro, which is complemented with a display instrument, and several autopilot options. By adding a shallow water echo sounder, and other equipment several complete product lines were created. Recurring theme is the focus on design, quality and a user-friendly operation.

After 20 years of full dedication to the commercial shipping industry, we have taken the steps into the yachting market. With new ideas and techniques, we have introduced a completely new perception of the integrated bridge. Over the years we have installed our systems on some of the world's most prestigious yachts and work closely together the most respected shipyards. High quality and matching aesthetics are the key for all our panels, consoles and integrated systems.

Whatever the challenge, Radio Zeeland DMP offers the perfect solution.
